JUDY LIN
FULL STACK DEVELOPER

Summary

I'm a full stack ninja developer. I love learning new things, reading docs (weird, I know), tinkering, and making things work. I'm also very interested in company culture and hope to find a company that cares not only about its employees, but also about giving back to our community. I'm currently pursuing a career as a junior/MEAN stack developer at a company that values their employees and fosters a creative mind. My goal is to build helpful programs that makes lives easier for others.

Projects

Product Tracker
A simple way to keep track of your product warranties before they expire. Created with: Node.JS/Express, JavaScript, HTML, and CSS/BootStrap.

Nurse Brain 2
An all-inclusive app for nursing professionals to quickly calculate proper doses, look up medication prices for patients, and look up drug information. Created with: Node.JS/Express, Crypto, CSS/Skeleton, Unirest, Twitter Typeahead. API references: GoodRX and FDA.

FlashCards - Your Coding Study Buddy.
Flashcards provides users with a way to prepare for tests, interviews, etc. by testing their knowledge in different categories. Users can add different categories/questions and see their score in their personalized profile page. Created with: Node.JS/Express, jQuery, MongoDB/Monk . API references: LinkedIn OAuth and Google Custom Search.

Firebase Angular Chat
Instant messaging app. Created with: AngularJS, JavaScript, Firebase/AngularFire, HTML, and CSS/BootStrap.

Circle Bounce
An interactive app where users can click on the page and watch circles bounce off each other. Created with: Node.JS/Express, CSS, JavaScript, HTML Canvas.
